

KENWAY CORPORATION

Augusta, ME

Kenway Corporation specializes in custom composite manufacturing and field service. The company is strategically positioned to serve customers by offering complete composite engineering and design capabilities so that they may bring both standard items as well as "one-off" special molded fabrications from the design phase, through the manufacturing phase, to the final on-site installation. Custom work and custom service are what distinguish Kenway as it manufactures product for industries ranging from marine, to coal-fired power, to infrastructure, to pulp and paper, to transportation, to renewable energy. What links the company's various business lines is: technologically advanced manufacturing techniques; products manufactured for exacting service applications; and the highest quality assurance procedures and processes.

Kenway Corporation and the MEP system:

"Kenway is an excellent example of a Maine MEP client continually reinventing themselves. They have worked with Maine MEP, improving workforce skills, productivity and competitiveness, and have built skills needed to grow and sustain their business. The company has been able to put the customer first, all the while maintaining a commitment to their valuable employees. They are a true model for success in their industry" – Muriel Mosher, Maine MEP President

Make it in America is an initiative supported by the National Institute of Standards and Technology's Manufacturing Extension Partnership (NIST MEP). NIST MEP works with small and mid-sized U.S. manufacturers to help them create and retain jobs, increase profits, and save time and money. The nationwide network provides a variety of services that put American manufacturers in a position to develop new customers, expand into new markets and create new products.
